DETAILED ACTION

Response to Amendment

Claims 36-68 are in the case.

Claims 1-35 have been canceled.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 36-68 are rejected under 35 U.S.C. 102(b) as being anticipated by Rabinovich et al (5,437,250).

Rabinovich et al teaches the gas blend or mix contains hydrogen and at least one other component in addition to hydrogen in which the other component is produced substantially simultaneously with the hydrogen by a hydrogen generator in which the relative amounts of the hydrogen and the other component is selected in accordance with the nature of the other component and the requirements of the engine for hydrogen assisted combustion within an engine to which the gas blend or mix is introduced.

3. Claims 36-68 are rejected under 35 U.S.C. 102(b) as being anticipated by Moard et al (5,299,536).

Moard et al teaches the gas blend or mix contains hydrogen and at least one other component in addition to hydrogen in which the other component is

produced substantially simultaneously with the hydrogen by a hydrogen generator in which the relative amounts of the hydrogen and the other component is selected in accordance with the nature of the other component and the requirements of the engine for hydrogen assisted combustion within an engine to which the gas blend or mix is introduced.

4. Claims 36-68 are rejected under 35 U.S.C. 102(b) as being anticipated by Benz et al (2005/0115226).

Benz et al teaches the gas blend or mix contains hydrogen and at least one other component in addition to hydrogen in which the other component is produced substantially simultaneously with the hydrogen by a hydrogen generator in which the relative amounts of the hydrogen and the other component is selected in accordance with the nature of the other component and the requirements of the engine for hydrogen assisted combustion within an engine to which the gas blend or mix is introduced.

Response to Arguments
